

Rural Municipality of Wellington No. 97

Approach Policy

Second Approaches

All requests for a second approach must be submitted to the Administrator in writing with a supporting site design. On the advice of the Foreman and if the request conforms to the standards set out by Council in this policy, the request shall be approved. A resolution acknowledging the second approach shall be passed at the next regular meeting of Council with a letter sent to the landowner confirming the approval.

Recognizing that there may be cases where exceptions may be made, all second approaches will be at the cost of the ratepayer and must meet the following standards:

- be a minimum of 30' wide
- be constructed at a right angle to the road
- be gravelled at the time of construction if the approach is on a developed, gravelled road
- shall not be placed within 91 metres (300 feet) from the centre of an intersection
- culverts required for the construction of the second approach will be supplied by the RM at no additional cost

The RM will provide grading services to smooth out the top and sides of the newly constructed second approach at the time of construction.

Approach Widening

All requests received for the widening of an existing approach must be submitted to the Administrator in writing with a supporting site design. On the advice of the Foreman and if the request conforms to the standards set out by Council in this policy, the request shall be approved. A resolution acknowledging the widening of the approach shall be passed at the next regular meeting of Council with a letter sent to the landowner confirming the approval.

Recognizing that there may be cases where exceptions may be made, all approach widening will be at the cost of the ratepayer and must meet the following standards:

- be constructed at a right angle to the road
- be gravelled at the time of construction if the approach is on a developed, gravelled road
- culverts required for the construction of the approach will be supplied by the RM at no additional cost

The RM will provide grading services to smooth out the top and sides of the newly widened approach at the time of construction.
